

Sanitary Centrifugal Pump

The MSS Sanitary centrifugal pump is suitable for applications in many industries including dairy, beer, wine, pharmaceutical and chemical.

It is suitable for low and middle grade viscous products and features a one piece, single suction open impeller to reduce resistance and eliminate unhygienic dead angle and minimises damage to the product.

Its simple intuitive design features quick and easy access for inspection and cleaning and is designed for CIP.

Components of the pump in contact with product are AIS316L, other parts are AIS304.

All units are fitted with a range of ABB motors from 1-5kW to 18.5kW and feature a sanitary mechanical seal with silicone carbide faces. Fitted with a 304 St shroud and adjustable feet allowing free standing or trolley mounting.
