

Course Objectives

This Nationally Accredited course is designed for persons who are required to use gas detection devices and test atmospheres.

Persons working in or on confined spaces must be trained to do so and comply with relevant WHS state/territory legislative requirements, Codes of Practice and AS/NZS 2865:2009.

The course presents a broad range of potential atmosphere hazards, implementation of safe work procedures, including the selection and correct use of gas testing equipment. The course includes extensive troubleshooting, fault finding and testing of gas detection equipment.

Successful attendees will be assessed as competent to Gas Test Atmospheres and operate portable gas detection devices.

Gas Test Atmospheres

MSMWHS217 Gas Test Atmospheres

Course Content

- Introduction
- Standards & Legislation
- Definitions
- Atmosphere Monitoring & Testing
