Course Objectives

Low Voltage Rescue and CPR training provides participants with the confidence and competence required to perform CPR on an unconscious casualty.

Low Voltage Rescue and CPR course provides participants with the confidence and competence required to perform CPR on an unconscious casualty

This training course is designed for any person whom may need to perform CPR to utilise DRABCD during their employment. This training course is taught according to the Australian Resuscitation Council (ARC) guidelines.

The course takes personnel through both the theory of why we do CPR and many practical exercises that emphasise the 'how' we perform CPR.

The accredited training component for Low Voltage Rescue teaches participants how to rescue a person using low voltage equipment and using a Low Voltage Rescue Kit.

Perform Rescue from a Live LV Panel
