

Course Objectives

To provide participants with the skills and knowledge to correctly install signs at road works or when working on the road and to apply worker safety and maintain smooth traffic flow and maintenance.

There are two versions of the course.

Two Day: For those inexperienced first time learners or for those whose tickets have expired

One Day: Refresher course for those that have completed training or have experience in the last 3 years. Evidence will be required.

This course must be completed at least every 3 years in accordance with the Department of Infrastructure and Transport (DIT) Workzone Traffic Management Program.

The course is delivered at our training centre, but can be delivered by arrangement at your site.

CITB funding is available for this course for eligible members.
